We now know the truth about the "Hess flight," though we have suspected it for decades. Adolf Hitler (inset left) did not send his No. 2 man, Rudolf Hess (above), to England with a peace treaty promising that Germany would pull out of Europe if only the Allies would agree to let him fight the USSR without fear of attack from the West. To keep the truth under wraps, Hess was locked up in solitary for decades and finally killed at age 93.

WWII Blockbuster!

• Adolf Hitler's 1941 peace offer finally confirmed

By Michael Collins Piper

It's been news in Israel and in Britain for weeks now, but the American media is keeping under wraps the advent of the release of a book that confirms what many have said for that Adolf Hitler sought peace with Britain in 1941 but that Hitler's offer was rejected by Prime Minister Winston Churchill.

Israel's *Ynet* as well as *The Telegraph* and *The Daily Mail* (both of London) reported this revelation that changes the "official" history of WWII and confirms what independent revisionist historians have said for years.

The *Daily Mail* of London, for example, reported that Peter Padfield affirms that the legendary "peace mission" to Britain in May 1941 by Hitler's loyal deputy, Rudolf Hess, was indeed authorized by Hitler and that Hess's purpose was to offer terms to withdraw German forces from occupied nations in Western Europe in return for Britain's support for (or otherwise not frustrating) an impending German attack on Soviet Russia, the date of which (five weeks hence) was disclosed.

Padfield reports that Hess's mission to offer a peace treaty (typed on Hitler's official stationery) — guaranteed Britain's maintenance of its independence, its empire and all of its colonies — was kept from the British public because Hess was English as a mass of "well-wishing neutrality" between Germany and Britain, something Hitler long endorsed.

Although, as *The Telegraph* noted, Hess's journey has traditionally been dismissed as "the deranged solo mission of a madman," Padfield's research shows that the mission was not closed or duly ignored or suppressed by the elite media and academics but Hitler chose to deny his foreknowledge of the mission and to distance himself in advance with Hess — if the mission failed, which it did.

Having evacuated his plane over Scotland, Hess expected to meet with British dignitaries interested in peace with Germany, only to be taken into custody by Churchill's agents. Padfield reports that knowledge of the Hess peace mission was suppressed by the Churchill government.

Padfield contends Hess was the victim of a British intelligence operation, approved by Churchill, that was designed to lure the German peacemaker to Britain. Padfield's conclusion that Hess was the victim of a British "honey trap" or "double cross" of the type British intelligence has long demonstrated an expertise in executing.

Padfield says that Hess's peace overtures was an unnamed English academic. Along with others, Padfield was called in to translate the treaty for Churchill who (although presented with an English translation carried by Hess) wanted a translation produced by his own operatives.

Padfield says that Churchill "threw a no mention of the treaty in any of the official archives which have since been made public, but Mr. Padfield believes this is because there was a cover-up to protect the reputation of the government's most powerful figure," noting Padfield has "also assembled other evidence to support the existence of the treaty and its contents — as well as the subsequent cover-up."

Padfield claims Churchill made a "secret choice" to reject Hess's peace proposal and to keep Hitler in power in order to use against Hitler and to bring the United States into the conflict.

By contrast, Churchill's critics have said that his determined push for war against Hitler — in the face of widespread opposition among the English people and even within the British royal family — is attributable to the fact that, some years before (having been virtually bankrupt and facing the loss of his estate), Churchill had been "bailed out" by a group of Jewish financiers — known as "the Circle" — who paid Churchill's debts in return for doing their bidding.

In any case, as Padfield notes, public exposure of the peace mission by Hess would have undercut Churchill's agitation for war.

Hess was tried and convicted of "war crimes" at the post-WWII Nuremberg tribunals and died in 1987 in prison reported to have committed suit over crimes, leaving Hess in British custody throughout the war.

Padfield's book, *Hess, Hitler and Churchill: Allies Ahead of the Spandau* prison in Germany in 1987 officially declared a suicide, though new evidence confirms that, as many long believed, the old man was actually murdered by the British.

Controversial Publisher Comments . . .

WILLIS CARTO, the publisher of revisionist historical journal THE BARNES REVIEW and author of *A Straight Look at the Second World War*, reflected on the new information contained in Michael Collins Piper's book. "I take a certain satisfaction in seeing what I wrote about Hitler's efforts for peace — and Churchill's insistence upon war — now being confirmed this many years later."

Although open-minded people have dared to look at the "Hess flight" as a peace mission for decades, Carto said, "I'm not so large," Carto added, "it's a point of view that runs contrary to that of organized Jewish and liberal groups that demand a monopoly on discussion about matters relating to WWII history."

"The consequence is that the release of this new book may be an unexpected (and very welcome) turning point, making a new beginning of taking a realistic, fact-based look at World War II," Carto concluded. "Let the chips fall where they may."

Carto — who won the Purple Heart after being wounded in the Philippines while in the U.S. Army during World War II — also recommended Piper's 2002 book, *Hess died at the Spandau* prison in Germany in 1987 officially declared a suicide, though new evidence confirms that, as many long believed, the old man was actually murdered by the British.

Did Brits Kill Peace Envoy?

• New documents substantiate claims in new book from THR

by Ronald I. Ray

May 1941, National Socialist Deputy Fuehrer Rudolf Hess flew a daring solo mission to Britain to personally present Adolf Hitler's peace proposals authorized by Adolf Hitler himself. But he flew into a trap set by British Prime Minister Winston Churchill, who was intent on prolonging World War II's bloodshed. Hess spent the next 46 years in prison, many in solitary confinement. At the age of 93, with his mind and body completely broken down, Hess was killed by an inferior athletic man, who could hardly hold a spoon or stand up on his own, allegedly hanged himself. Or did he?

Author Michael Collins Piper's *Rudolf Hess: Murder*, the Nazi leader's last caretaker and nurse, Abdallah Melaouhi, lays out the evidence that Hess was in fact murdered by black American soldier Tony Jordan and two other men dressed as U.S. soldiers.

Now, recently declassified British documents, including part of an autopsy report, have been released that substantiate Melaouhi's eyewitness account and once again the question: Why have Hess's murderers not been brought to justice? Indeed, why was he murdered at all?

In March 2012, London's *The Daily Mail* published previously secret photographs of the garden house at Spandau Prison in Berlin from the afternoon of the death. The images show clear signs of struggle and other details provided otherwise only by Melaouhi's eyewitness account. Piper's book includes the full text of the *Mail*'s The photographic evidence appears to disprove the Allies's bizarre claim that Hess committed suicide.

Most recently, on Sept. 6, another London paper, *The Independent*, published additional, previously top-secret information on the case. The paper reported that Hess was beaten to death by guards, as American soldiers, as the autumn of the defendants, elderly men, who had yet hoped to be reunited with his family before dying. Hess was killed by U.S. Army Sergeant Duane Gerald Gibson, Prison Superintendent Howard Jones, an English surgeon, Dr. Hugh Thomas, had passed to Jones the names of the two alleged murderers, which Thomas had received from a former member of the SAS.

The informant also claimed that it was upon the order of the British government that the murderers were given medals for their alleged WWII service. Jones thought this unsolved a Nazi plot to overthrow the Churchill government — a ridiculous assertion, given Hess's peaceful intentions and mission. The author of the book agrees and believes there to be "much substance" to the doctor's claims, he did recommend that efforts be made to find the killers and other witnesses.

It is not known, however, if those men were indeed located, since investigations into Hess's murder appear to have been suppressed by the investigation. Apparently, powerful forces had a vested interest in concealing the truth from the world.

Piper's book is available here. You can read the rest of the amazing, true story in *Rudolf Hess: the Betrayal of Murder*. Also contact the U.S. and British governments to demand that they find and prosecute the three men and their co-conspirators who murdered Hess.
